
Other RC Activity at the flying site

Posted by macs - 2010/01/24 17:18

I spoke to a member of the RC car racing club today.

It would seem that we will have a fair few more fellow models at the site. The RC Car Club have just won them selves a grant to rebuild the model Car Tarmac track, which is over in the far corner.

(very nice i'd like a tarmac runway and a control tower please).

As i understand the work should be starting very soon.

I view this as a big Plus as the more modeler there are, the greater our representation for organised Modeling at the site.

Two RC clubs carry more weight than one.
