## Autogyro ( Not what you get from a Post Office!)

Posted by kairos - 2009/06/29 15:28

---

Hi,  
Does anyone fancy building a model autogyro this winter? If so look at [www.whirlybirdaviation.com](http://www.whirlybirdaviation.com)

The autogyro in question is a DAG R1,R2 etc .  
You can build a basic profile bodied model up to a pukka 1930's scale'ish autogyro

I have tried to e-mail the designer to find out how to obtain the plans? But the e-mail button crashes my computer!!!

There is plenty of info on r/c type forums. You will require a gearbox, which hopefully is available from Fanfare at £16.00.  
(Master Airscrew 500 gearbox).  
So to sum up I am still searching for plans. All help would be appreciated  
Richard.

Hi Mark,  
Whoops , I missed the auction but I would be interested to know how you get on. Maybe we could set a trend and have a fleet of autogyros!  
Of course mine would have to be IC!!  
Richard.

I hope the picture will up load  
Well all this weather is good news for the building board; this is my direct control (no elevator or rudder)"sparky"autogyro from a Traplet plan.  
Come on Richard you have so catching up to do.

Hi Mark,  
I can see I will have to put my money where my mouth is . I have been side tracked onto other projects.  
Logos ,Slope soaring and general repairs.  
Plus I hope to build my own design 1930's style IC plane over the winter months.So the auto-giro has fallen by the wayside:S  
It would be good if next year we had a pair of auto-giros flying round together.  
Richard.
